

JAVA MINIPROJECT

SEMESTER II

BATCH E1

FILMISTAAN: A MOVIE BOOKING PLATFORM

DEVELOPERS:-

ADITI SARASWAT : UCE2023501

AKSHITA TOTALA : UCE2023504

SWALIHA ATTAR : UCE2023506

VARDAYINI DESHMUKH : UCE2023519

PROBLEM STATEMENT:

A movie ticket booking platform that enables users to be able to book tickets from the leisure of their homes.

OUR FEATURES:

- Users have complete freedom to book their tickets according to their preferences in theaters, dates and also slots!
- Each theater, on each date has unique movie screenings, providing the user with ample choices to select from.
- We provide the option of viewing the movie details before booking seats.
- The details include movie duration, cast, director, genre, IMDb rating and much more!
- Users can book as many gold, silver or bronze seats according to their preferences.
- Not only that, but the user also has an option to access the visuals of the seating arrangement provided to the user (displaying booked and unbooked seats) at every step of seat booking.
- A Detailed invoice including the details of the movie booking and split up of the total amount (Inclusive of all Taxes).

CODE:-
